Model No. CM21KX81  
CM21KX81A  
CM21LX81  
CM21LX81A  
CM21MX81  
CM21MX81A

(Middle East)

Service Ref. No. CM21KX81-00  
CM21KX81A-00  
CM21LX81-00  
CM21LX81A-00  
CM21MX81-00  
CM21MX81A-00

### Specifications

Power Source . . . . . AC110-240V, 50Hz/60Hz.  
Colour System . . . . . PAL/SECAM/NTSC4.43/NTSC/PAL-60Hz  
Television System . . . . . B/G, D/K, K', I, M/M  
Channel Coverage . . . . . VHF: E2-E12, R1-R12, K1-K9, A2-A13, J1-J12  
UHF: 21-69, A14-A69, J13-J62  
CATV: S1-S41, X, Y, Z, Z+1, Z+2  
Video IF . . . . . 38.0MHz  
Aerial Input Impedance . . 75Ω  
Ext. Terminals  
Video inputs: Phono jack × 2 (1Vp - p, 75Ω)  
Audio inputs: Phono jack (L/R) × 2(436mVrms, more than 40KΩ)  
Video monitor outputs: Phono jack × 1(1Vp - p, 75Ω)  
Audio monitor outputs: Phono jack (L/R) × 1(436mVrms, less than 600Ω)  
Sound Output (RMS) . . . . 5W + 5W  
Speaker . . . . . 6 cm × 12 cm × 2 pcs.  
Dimensions . . . . . Model CM21KX81/A: 625 (W) × 460.5 (H) × 384 (D)mm  
Model CM21LX81/A: 645 (W) × 465 (H) × 484 (D)mm  
Model CM21MX81/A: 645 (W) × 465 (H) × 484 (D)mm  
Weight . . . . . Model CM21KX81/A: approx. 21.2 Kg  
Model CM21LX81/A, CM21MX81/A: approx. 20.8 Kg

Specifications subject to change without notice.

111358247 (CM21KX81A)  
111368013 (CM21LX81)  
111368033 (CM21LX81A)  
111368713 (CM21MX81)  
111368733 (CM21MX81A)

### Original Version

### Chassis Series: AC5-G1

Give complete "SERVICE REF. NO." for parts order or servicing. It is shown on the rating plate at the cabinet back of the unit.

This T.V. receiver will not work properly in foreign countries where the television transmission system and power source differ from the design specifications. Refer to the specification table.

# Safety Notice

---

## SAFETY PRECAUTIONS

- 1: An isolation transformer should be connected in the power line between the receiver and the AC line when a service is performed on the primary of the converter transformer of the set.

2: Comply with all caution and safety-related notes provided on the cabinet back, inside the cabinet, on the chassis or the picture tube.
- 3: When replacing a chassis in the cabinet, always be certain that all the protective devices are installed properly, such as, control knobs, adjustment covers or shields, barriers, isolation resistor-capacitor networks etc.. Before returning any television to the customer, the service technician must be sure that it is completely safe to operate without danger of electrical shock.

## X-RADIATION PRECAUTION

The primary source of X-RADIATION in television receiver is the picture tube. The picture tube is specially constructed to limit X-RADIATION emissions. For continued X-RADIATION protection, the replacement tube must be the same type as the original including suffix letter. Excessive high voltage may produce potentially hazardous X - RADIATION. To avoid such hazards, the high voltage must be maintained within specified limit. Refer to this service manual, high voltage adjustment for specific high voltage limit. If high voltage exceeds specified limits, take necessary corrective action. Carefully follow the instructions for + B1 volt power supply adjustment, and high voltage check to maintain the high voltage within the specified limits.

## PRODUCT SAFETY NOTICE

Product safety should be considered when a component replacement is made in any area of a receiver. Components indicated by mark  in the parts list and the schematic diagram designate components in which safety can be of special significance. It is particularly recommended that only parts designated on the parts list in this manual be used for component replacement designated by mark . No deviations from resistance wattage or voltage ratings may be made for replacement items designated by mark .

## Service Information

### ■ Protection Circuit

This TV set has a built-in power supply protection circuit.

It is provided to protect the TV set in case of a power supply circuit malfunctions. When something abnormality occurs during TV reception, the TV set goes to the stand-by mode.

When an abnormality occurs during TV reception, it causes pin 27 of the CPU to go continually Low (less than 0.75V) for about one second. The CPU detects that this has occurred and outputs the signal from pin 31 to switch off the power supply lines.

### Releasing the protective circuit and restoring power supply

To release the protective circuit and restore power supply, turn the power to the TV set OFF and then ON again via either the main power switch or the ON-OFF button on the remote control. This will work only if the power supply trouble was temporary. If there is permanent trouble such as a damaged circuit, power cannot be restored and the circuit will have to be repaired.

# Service Adjustments with Replacing Memory IC(IC802)

Note: The CPU (IC801) and memory IC (IC802) store the service adjustments data and controls data for each circuit. When the Memory IC (IC802) is replaced, some of the service adjustments should be readjusted to obtain the best performance. The necessary service adjustments are carried out by using the RC handset. Please set up the TV set with following steps [1] to [2].

## [1] Initializing Procedure

1. Put a new memory IC.
2. Turn on the TV set.
3. Press and hold the **TV/AV Selector** on the TV set for more than 2 seconds. The following picture appears on the screen.

Press and hold for more than 2 seconds

4. Press the **PROGRAMME UP** on the TV set while the above On-Screen Display is still on the screen. The following picture appears on the screen.

This completes the initialization of memory IC.

Following shows the initialized contents of memory data by this procedure.

- |                     |                |
|---------------------|----------------|
| - Plug & play       | : No executed  |
| - Inhibit data      | : Cancelled    |
| - Ch skip data      | : Cancelled    |
| - Sound volume data | : 10/63 steps. |
| - Volume Lock       | : OFF          |
| - Tuning Lock       | : OFF          |
| - Colour system     | : AUTO         |

## [2] Required Service Adjustments

Readjust the following service adjustments.

| <u>Adjustments</u>    | <u>Service Mode No. &amp; Item</u> |
|-----------------------|------------------------------------|
| RF AGC                | Item 01, RF AGC                    |
| Horizontal centre     | Item 02, H-PHA                     |
| Vertical size         | Item 04, V-SIZ                     |
| Vertical-S correction | Item 05, V-SCO                     |
| Vertical linearity    | Item 06, V-LIN                     |
| Gray scale            | Item 14-17, 19-21                  |

Further adjustment please refer to page 12 and 13.

# Service Adjustments with Replacing Memory IC(IC802)

Following table shows the initial values which have been stored in the CPU ROM, and items for the service adjustments.

## Service mode adjustments table in CPU ROM

| No. | ITEM          | DATA RANGE | INITIAL SETUP DATA | DESCRIPTION                                              |
|-----|---------------|------------|--------------------|----------------------------------------------------------|
| 01  | RFAGC         | 0~63       | 31                 | RF AGC Adj.                                              |
| 02  | H-PHA         | 0~31       | 7                  | H-Phase (H-Centering) Adj. (50Hz)                        |
| 03  | V-POS         | 0~63       | 40                 | V-Position (V-Centering) Adj. (50Hz)Fixed.               |
| 04  | V-SIZ         | 0~127      | 80                 | V-Size Adj. (50Hz)                                       |
| 05  | V-SCO         | 0~31       | 7                  | V-S Correction (50Hz)                                    |
| 06  | V-LIN         | 0~31       | 18                 | V-Linearity Adj. (50Hz)                                  |
| 07  | H-P60         | -16~+15    | +5                 | H-PHASE Adj. (60Hz)                                      |
| 08  | V-S60         | -64~+32    | 0                  | V-Size Adj. (60Hz)                                       |
| 09  | OSDHP         | 0~255      | 26                 | OSD H-Position Adj.                                      |
| 10  | OSDC          | 0~127      | 45                 | OSD Contrast Adj.                                        |
| 11  | V-SCP         | 0~7        | 7                  | Correction of the V-size accompanying brightness change. |
| 12  | H-SCP         | 0~7        | 7                  | Correction of the H-size accompanying brightness change. |
| 13  | SBIAS         | 0~127      | 105                | Sub Bias Adj. (Do not change)                            |
| 14  | RBIAS         | 0~255      | 0                  | Red Bias Adj.                                            |
| 15  | GBIAS         | 0~255      | 0                  | Green Bias Adj.                                          |
| 16  | BBIAS         | 0~255      | 0                  | Blue Bias Adj.                                           |
| 17  | RDRIV         | 0~127      | 64                 | Red Drive Adj.                                           |
| 18  | GDRIV         | 0~15       | 8                  | Green Drive Adj.                                         |
| 19  | BDRIV         | 00~127     | 64                 | Blue Drive Adj.                                          |
| 20  | 1-LINE APPEAR |            |                    | White Balance Adj.                                       |
| 21  | DRV           |            |                    | White Balance Adj.                                       |
| 22  | B-YD          | 0~15       | 5                  | B-Y DC level Adj.                                        |
| 23  | R-YD          | 0~15       | 5                  | R-Y DC level Adj.                                        |
| 24  | B-YDN         | -16~+15    | 0                  | NTSC B-Y DC level Adj.                                   |
| 25  | R-YDN         | -16~+15    | 0                  | NTSC R-Y DC level Adj.                                   |
| 26  | SBDC          | -16~+15    | -8                 | SECAM B-Y DC level Adj.                                  |
| 27  | SRDC          | -16~+15    | -5                 | SECAM R-Y DC level Adj.                                  |
| 28  | G-YA          | 0,1        | 0                  | G-Y angle Adj.                                           |
| 29  | RBGB          | 0~15       | 8                  | R-Y, B-Y Gain Balance Adj. (Do not change.)              |
| 30  | RBAG          | 0~15       | 8                  | R-Y, B-Y Angle Adj. (Do not change.)                     |
| 31  | G-YAN         | 0,1        | 0                  | NTSC G-Y Angle Adj.                                      |

**Notes:** The initial value that the CPU writes down the CPU ROM data to the memory when replaced the memory IC. TV set may not operate correctly with this initial value. It is required to set up the fine adjustment for service adjustments described in the above.

# Service Adjustments with Replacing Memory IC(IC802)

## [Entering to Service Mode]

1. Press and hold the **MENU** button on the Remote Control and press the **VOLUME (+)** button on the TV set.  
Following setting items appears on the screen.

2. Select item by pressing the **TIMER** (Item No. UP) or **SOUND MUTE** (Item No. DOWN) button on the remote control handset.

### Example

Display for [V-SCO] V-S Correction adjustment

Display for [DRV] White balance adjustment

3. Adjust data value by pressing the **VOLUME +** or **VOLUME -** button on the remote control handset.

To return to normal TV mode, press the **MENU** button on the TV set or the remote control handset.

# Service Mode Adjustments

Following adjustments should be carried out when the memory IC is replaced. How to enter the service mode and adjust values, please refer to "Entering to Service mode" on page 11.

## Item 01 [RF AGC] AGC

NOTE: Do not attempt this adjustment with weak signal.

- (1) Tune the receiver to most clearest (or strongest) VHF station in your area. Set the brightness and contrast controls to maximum. Set the colour control to minimum.
- (2) Select [RF AGC] in the service mode.
- (3) Change value until the snow noise just disappears.
- (4) Exit from service mode.

## Item 02 [H-PHA] HORIZONTAL CENTRE

- (1) Receive a monochrome circular pattern.
- (2) Set the brightness and contrast to normal.
- (3) Select [H-PHA] in the service mode.
- (4) Change value to be optimum horizontal centre position.
- (5) Exit from service mode.

## Item 04 [V-SIZ] VERTICAL SIZE

- (1) Receive a monochrome circular pattern.
- (2) Set the brightness and contrast to maximum.
- (3) Select [V-SIZ] in the service mode.
- (4) Change value to be optimum vertical size.
- (5) Exit from service mode.

## Item 05 [V-SCO] V-S CORRECTION

- (1) Receive a crosshatch pattern.
- (2) Select a picture mode of NATURAL by pressing the PICTURE MODE button.
- (3) Select [V-SCO] in the service mode.
- (4) Adjust Vertical S-letter Correction so that the difference of "c", "d" and "e" becomes less than 2 mm by pressing the VOLUME + or - button.
- (5) Confirm Vertical Linearity and adjust Vertical Center then Vertical Size.
- (6) Exit from service mode.

## Item 06 [V-LIN] VERTICAL LINEARITY

- (1) Receive a crosshatch pattern.
- (2) Select a picture mode of NATURAL by pressing the PICTURE MODE button.
- (3) Select [V-LIN] in the service mode.
- (4) Adjust Vertical Linearity so that the difference of "a" and "b" becomes less than 3mm by pressing VOLUME + or - button.
- (5) Exit from service mode.

# Service Mode Adjustments

## Items 14-17, 19-21 GREY SCALE

- (1) Receive the monochrome circular pattern.
- (2) Set the brightness and colour to normal, contrast to maximum.
- (3) Enter to the service mode.
- (4) Set each value of Item-14 **RBIAS**, 15 **GBIAS**, 16 **BBIAS**, 17 **RDRIV** and 19 **BDRIV** mode to 64.
- (5) Select Item-20 mode to be one horizontal scanning line and turn the screen volume on the FBT to obtain just visible one coloured line.
- (6) Press the **1 (Red Bias -)**, **2 (Red Bias +)**, **5 (Green Bias -)**, **6 (Green Bias +)**, **9 (Blue Bias -)** or **0 (Blue Bias +)** button to adjust the brightness of each colour until a dim white line produced. Please see the control button allocations in this mode.
- (7) Select Item-21 **DRV** mode to enter the white balance adjusting mode.
- (8) Press the **3 (Red Drive -)**, **4 (Red Drive +)**, **-/-- (Blue Drive -)** or **RECALL (Blue Drive +)** button alternately to produce normal black and white picture.
- (9) Exit from the service mode.
- (10) Check for proper grey scale tracking at all brightness levels.

NOTE: If the grey scale adjustment is made after picture tube replacement, check the high voltage.

Press the MENU button to exit from service mode.

# Service Adjustments

Following adjustments are not required to readjust when replacing the memory IC.

## B-VOLTAGE SUPPLY CHECKING

- (1) Connect DC meter to TP-B and the ground.
- (2) Tune the receiver to an active channel and synchro-nized picture. Select NATURAL picture mode by pressing the **PICTURE MODE** button on the remote control.
- (3) Adjust B-voltage to be  $130 \pm 1V$  DC by using VR631.

MAIN BOARD

## HIGH VOLTAGE CHECK

**Note:** +B (+130V) Voltage Check and Grayscale Adjustment must be completed before attempting High Voltage Check.

- (1) Connect high voltage voltmeter negative lead to ground, and connect + lead to anode of picture tube.
- (2) Tune receiver to an active channel and confirm TV is operating properly.
- (3) Maximize the beam current by adjusting the contrast and brightness controls to maximum. Confirm high voltage is within 24.0 KV and 26.5 KV at maximum beam current.
- (4) Eliminate the beam current by adjusting the contrast and brightness controls to minimum. Confirm high voltage does not exceed 28.0 KV at zero beam current.

If reading is not within range, check horizontal circuit.

No high-voltage adjustment is provided on this chassis.

## FOCUS ADJUSTMENT

- (1) Receive the monochrome circular pattern.
- (2) Set the brightness to normal and contrast to maximum.
- (3) Adjust the focus control on the F.B.T. for the best focus on the screen centre.

# Special Function

The following special functions can be set up on this TV set.

## (1) Volume Lock setting

With this function, a maximum sound volume limit can be set at any level.

## (2) Tuning Lock setting

Once TUNING LOCK is switched on, further channel tuning (Pre-set) is not possible. The Channel Swapping function also is not possible.

## (3) Music Mode setting

When Music Mode is ON, Programme position from "91" to "99" and "0" are set Music Mode. Only sound is provided and any picture is not on the screen under Music Mode.

## (4) AV Start setting

Set AV-START to ON and every time the TV set is switched on, AV position will be the initial programme position.

## How to set the special function:

**Note:** When making the VOLUME LOCK setting, set the desired maximum sound volume by pressing the **VOLUME +** or **-** button before entering Special Function setting mode.

- 1 To enter into the special function setting mode, press and hold the **MENU** button of the remote control, then press the **PROGRAMME DOWN** button on the TV set.

- 2 Select an item of the special functions by pressing the **PROGRAMME UP** or **DOWN** button on the remote control or the TV set.

- 3 Set the selected special function "ON" by pressing the **VOLUME +** or **-** button. To cancel, set to "OFF".

- 4 Press the **MENU** button of the remote control to return to the normal TV mode.

# Purity and Convergence Adjustment

**CAUTION:** The Convergence and Purity adjustments have been made at the factory. Readjustment should be made only after picture tube or deflection yoke replacement, following the steps below:

## PURITY ADJUSTMENT

1. Demagnetize the picture tube and receiver using an external degaussing coil. When replacing picture tube or deflection yoke, mount deflection yoke and purity-convergence magnets assembly properly, see figures 1 and 4.
2. Turn Red and Blue guns off and provide only Green raster. Rotate Screen control to fully counterclockwise. Rotate Red and Blue Bias controls fully counterclockwise. Slowly rotate Green Bias control clockwise to produce Green raster.
3. Loosen the screw holding the Deflection Yoke and remove the 3 Rubber Wedges, and slide the Deflection Yoke fully forward.
4. Rotate and spread the Tabs of the two Purity Magnets to centre the vertical green belt in the picture screen. The Purity Magnets are also adjusted to obtain vertical centring of the raster.
5. Slowly slide the Deflection Yoke backward until a uniform green screen is obtained.
6. Check the purity of the red and blue screens for uniformity, turn off other colours to check this (use bias controls). Readjust the yoke position if necessary until all screens are pure.
7. Adjust each Bias control and screen control to obtain white raster. Refer to Gray Scale Adjustment. If part of the picture screen is coloured, adjust the Deflection Yoke position forward or backward slightly.

8. Tighten the mounting screw of the Deflection Yoke. Adjust Convergence next.

## CENTRE CONVERGENCE ADJUSTMENT

1. Use a dot crosshatch pattern signal.
2. Turn Red and Blue guns on and turn off Green gun. Adjust the angle between the Tabs of the Four Pole Magnet 1 and 2, and superimpose the Red and Blue vertical lines in the centre area of the picture screen. Refer to figure 2.
3. Keeping the mutual angle of the Tabs of the Four Pole Magnet turn them together to superimpose the Blue and Red horizontal lines in the centre area of the picture screen. Refer to figure 2.
4. Turn Green gun on and adjust Six Pole Magnet 3 and 4 that the Green line superimposed on the Red/Blue lines. This is the same procedure used in steps 2 and 3. Refer to figure 3.

## OUTER AREA CONVERGENCE ADJUSTMENT

Slightly loosen the screw holding the Deflection Yoke. Adjust the Deflection Yoke to converge the detail in the outer area (left side and right side) of the picture screen by orbital movement of the front of the Yoke, then secure the Deflection Yoke in appropriate position by putting the wedges as illustrated. Tighten screw holding the Deflection Yoke.

Figure 1. Purity and Convergence Magnets

Figure 4. Deflection Yoke Movement

Figure 5. Adjusting Magnet

Adjust tabs angle to superimpose blue and red vertical line.

Figure- 2 BLUE AND RED LINE MOVEMENT

Adjust tabs angle to superimpose red/blue and green vertical line.

Figure- 3 BLUE/RED AND GREEN MOVEMENT

# Cabinet Parts List

Note: Parts order must contain Service Ref. No., Part No., and descriptions.

# Chassis Electrical Parts List Model CM21KX81/A, CM21LX81/A, CM21MX81/A C6YR

Product safety should be considered when a component replacement is made in any area of a receiver. Components indicated by a  $\Delta$  mark in this parts list and the circuit diagram show components whose value have special significance to product safety. It is particularly recommended that only parts specified on the following parts list be used for components replacement pointed out by the mark.

Note: Parts order must contain Service Ref. No., Part No., and descriptions. The main PCB unit will be supplied without tuner and flyback transformer. They should be ordered separately.

| Ref. No.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Part No. | Description | Ref. **THE SERVICE PRECAUTION:**  
The area enclosed by this line( ) is directly connected with AC mains voltage.  
When servicing the area, connect an isolating transformer between TV receiver and AC line to eliminate hazard of electric shock.

**COLOUR TELEVISION**

**SANYO AC5-G1 CHASSIS SERIES**

**SERVICE REF. NO.**

**CM21LX81/A-00**  
**CM21MX81/A-00**

**PRODUCT SAFETY NOTICE:**  
Product safety should be considered when a component replacement is made in any area of a receiver.  
Components indicated by a mark  $\Delta$  in this circuit diagram show components whose values have special significance to product safety. It is particularly recommended that only parts specified on the part service manual be used for components replacement pointed out by the mark.

- CIRCUIT DIAGRAM NOTICE:**
- All resistance value are in ohms, K=1,000, M=1,000,000.
  - All resistance rated wattages are 1/6W unless otherwise noted.
  - Excepting electrolytic capacitors, all capacitance values of less than 1 are expressed in  $\mu$  F and more than 1 are pF.
  - All capacitance rated voltages are 50V unless otherwise noted.
  - All inductance values are in  $\mu$  H.
  - Voltage readings take with a "VTVM" are from point indicated chassis ground. Voltage readings taken by using PAL colour bar signal are with all controls at normal position. Some voltage may vary with signal strength.
  - Waveform were taken with PAL colour bar and controls adjusted for normal picture. Waveforms were taken by using a wide band oscilloscope and a low capacity probe.
  - This circuit diagram covers a basic or representative chassis only. There may be some components or partial circuit differences between the actual chassis and the circuit diagram.
  - Parts specified with "X" are not installed in this model.
  - Parts specified with "J" are just jumper wires.

11. Expression of capacitance and resistance in circuit diagram.

**Capacitance (Example)**

1000 C M 2000 D

J=  $\pm 5\%$   
K=  $\pm 10\%$   
M=  $\pm 20\%$

Characteristic  
Capacitance value (220pF)  
Allowable error ( $\pm 20\%$ )  
Kind (Ceramic)  
Rated voltage (1,000V)

**Resistance (Example)**

1/2 N J 1.2

Resistance value (1.2 $\Omega$ )  
Allowable error ( $\pm 5\%$ )  
Kind (M.carbon)  
Rated wattage (1/2W)

T: A, U, D:  
Electrolytic  
C, K, B: Ceramic  
F: Mylar film
